

Mohammed Moinuddin Shaikh

Backend Engineer | AI/ML Systems | Cloud Infrastructure

s.moinuddin2310@gmail.com | +91 9892792786 | moinuddin.vercel.app | Github | LinkedIn | Mumbai

Professional Summary

Backend Engineer experienced in designing cloud-native applications using Python, Flask, AWS, Docker, and PostgreSQL. Built production systems featuring REST APIs, layered architectures, cloud deployments, and AI-powered services. Passionate about scalable backend infrastructure, distributed systems, and software architecture.

Technical Skills

Languages: Python, Java, SQL, Dart, JavaScript

Cloud & DevOps: AWS (EC2, S3, DynamoDB, SNS), Firebase, Docker, Nginx, Gunicorn, Git, Linux

AI & ML: PyTorch, TensorFlow, Keras, Transformers, HuggingFace, OpenCV, Librosa, MTCNN

Frameworks & Tools: NextJS, Flask, Flutter, SQLAlchemy, PostgreSQL, MinIO, NumPy, Pandas

Experience

Full Stack Developer | Contract

Feb 2026 – May 2026

- Built and deployed 2 e-commerce platforms (ecommerce-nvaw.vercel.app) for a Mumbai-based apparel client, featuring admin dashboards, custom T-shirt design preview modules, and dual-gateway payment integration (Razorpay + Stripe) handling live transactions.
- Managed **PostgreSQL** (Neon DB) data layer and **MinIO** object storage, containerized with **Docker** for consistent dev-to-production parity.

Flutter Developer Intern | M.S.D. Engineering

Jan 2025 – Mar 2025

- Developed 4–5 application screens and integrated a **Gemini API**-powered chatbot, automating learner query resolution in a **Flutter**-based e-learning platform.
- Built and managed the **Firebase Firestore** data layer, handling real-time course content sync and user progress tracking.

Projects

SnapStream | AWS Capstone – EC2, S3, DynamoDB, Nginx, Gunicorn, Python | GitHub

Dec 2025 – Feb 2026

- Designed and deployed a cloud-native media streaming platform on **AWS** (EC2, S3, DynamoDB) behind **Nginx** and **Gunicorn**, validated under a live college demo with no downtime on a t2.micro instance.
- Implemented the **Service-Repository** pattern with a hybrid storage architecture, separating business logic from data access for improved modularity and maintainability.
- Designed REST APIs for media upload, retrieval, and metadata management, integrating **S3** for object storage and **DynamoDB** for metadata persistence.

Copyright Detection in GenAI | PyTorch, TensorFlow, HuggingFace, Librosa, OpenCV | GitHub

Nov 2025 – Mar 2026

- Engineered a **microservices-based** audio-video detection pipeline using PyTorch, Librosa and TensorFlow, combining facial and Mel-spectrogram analysis to identify AI-generated media.
- Resolved a critical biometric pipeline failure by applying **L2 Normalization** to 512-dimensional FaceNet embeddings, improving Cosine Similarity identification accuracy to **97%+**.
- Improved deepfake detection precision to **94%+** by designing an **OpenCV** facial-extraction pipeline that removes background pixels before CNN inference, validated using a held-out test set.

Education

M.H. Saboo Siddik College of Engineering

Mumbai, India

Bachelor of Engineering in Information Technology | CGPA: 8.85

2022 – 2026

Achievements

Winner – Techmasters 2025–2026, IETE MHSSCE: First place in the institute-level technical competition.

Finalist – Bank of Baroda Hackathon (Oct 2024): Shortlisted for an NLP-powered banking chatbot among national submissions.

Certifications

AWS Academy – Cloud Operations (Dec 2023), ML Foundations (Mar 2024), Machine Learning for NLP (Jun 2024)

IBM AI Developer Professional Certificate (Sep 2024)
